Summary of the content:	<p>This course will provide the basic instruments for the economic analysis of development, accounting for the main theories, facts and the experiences that have been pursued by specific groups (industrialised, emerging and developing) of countries. During the course we will discuss as well some of the major issues that hamper the way to development. These includes, for instance, issues related to environmental sustainability; digital transformations; global economic governance; inequalities. The course will raise students' awareness of the global challenges developing countries face, and on the most effective policies to face them. Such skills will be relevant within jobs in national and international institutions, NGOs and enterprises.</p>
