	Other:	Seminar		
Type(s) of evaluation:	Sitting exam		Written report	
	Oral defence		Group project	
	Other comments:	/ Term paper		
Expected deadline(s) for the evaluation(s):	July			
Expected date of final results:	End of semester (30 September)			
Summary of the content:	<p>To understand how capitalism has developed and changed since the time of the industrial revolution and to examine in detail the economic and political characteristics of the new phase of capitalism that began in the 1980s.</p> <p>Students will gain an understanding of the specific ways in which politics and economics interact in a capitalist economic system, of how this system is in a process of continual change, and the role that conflict plays, both within and between countries, in driving economic and social development.</p>			
Indicative list of lectures:	<p>The course will begin by examining the emergence of industrial capitalism, and the debate about whether it was the growth of world trade or domestic developments that were the key factor. It will then look at how the development of capitalism can be divided into phases by considering the organisation of work, the structure of the firm, the functions of the state, the nature of the monetary and financial system, and the role of trade and the world market. A major part of the course will be concerned with the specific features of the new phase of capitalism that has developed since the 1980s and the impact of the major international crisis in 2007-09. This includes the role of global financial markets, the importance of multinational corporations, and the</p>
