Teaching method(s):	<input checked="" type="checkbox"/> Lecture courses		<input checked="" type="checkbox"/> Flipped classroom	
	Other: _____			
Type(s) of evaluation:	<input checked="" type="checkbox"/> Sitting exam		<input checked="" type="checkbox"/> Written report	
	<input checked="" type="checkbox"/> Oral defence		<input checked="" type="checkbox"/> Group project	
	Other / comments: _____			
Expected deadline(s) for the evaluation(s)				
Expected date of final results:				
Summary of the content:	<p>The course aims at a critical advanced treatment of some central aspect of current economic theory, with reference to its macroeconomic aspects: Output determination and the relationship between investments and savings.</p> <ol style="list-style-type: none"> 1. The saving-investment equilibrium and production level in neoclassical theory and in the Keynesian approach 2. Investment as a negative function of the interest rate and its connection to neoclassical capital theory. Other attempts to provide a foundation for the above relation with the interest rate. 3. Savings and investments in modern macro- dynamic neoclassical analyses 4. Savings, Investments and productive capacity: long run relations in an alternative analytical frame work 5. Aggregate demand, output and saving: implications for economic polizie, with particular renard to the public debt issue
